

ZYGO-USA Assistive Technologies for Communication and Independence

Product Spotlight: **PapooTouch**

If you have not yet seen the **PapooTouch**, you should make a point to do so. It is stylish, portable, and functional, and lets you communicate easily with your friends and family while on the go. It's a dedicated communication device with a range of installed apps, including **Grid Player**, with SymbolStix for symbol users, text for typists, and digital pictures for realistic active scene displays and photographs of real people.

You can quickly customize vocabulary pages using **The Grid 2** on your Windows PC. It's a snap to upload to the Online Grids web site or simply drag and drop between folders while the **PapooTouch** is connected to your PC through a USB port.

Choose between the **PapooTouch**, the scanning **PapooTouch+**, and packages that include **The Grid 2** so you can customize and update your page sets as often as you like.

AD Head Pointers *with **NEW** iPad Tips!*

Our three head pointers have just been upgraded to include a brand new tip that is intended for use with **iPad**, **iPhone**, and **iPod Touch**, as well as other touch screen tablets including **Android** and all other AAC dynamic display devices. They still utilize the original design whereby the pointer comes from the chin, making it easier to see and make selections.

We sell replacement rods with iPad tips for converting older units into those with the new iPad tips. The price for the replacement rods is \$35 plus shipping.

Grid 2 on Windows 8

As you may know, Windows 8 was released last month. You can continue using The Grid 2 on Windows 8 machines — just make sure that you are using the latest version of The Grid 2. There is a great new grid set at Online Grids to get you started with Windows 8. It is aimed at switch users, and will allow customers to navigate around the new-style Start and settings menus.

Beware of the cut-down version called Windows 8 RT, as it does not run desktop programs such as The Grid 2. It's mainly intended for running apps.

ATIA Orlando

ZYGO-USA is heading back to Orlando next month for the ATIA 2013 conference being held at the Caribe Royale from January 30 to February 2, 2013. Come see us in Booth #408 and spend some time getting to know our lineup of new products we have this year.

Demo products and literature

We have demonstration devices in our loan bank. All of our products are available to SLP's and AT Centers for evaluation demonstrations. We have special pricing if you would like to add our products to your AT Center. And let us know if you need any catalogs, or The Grid 2 demo CD's, or other product literature to hand out.

Happy Holidays

With the end of the year holidays upon us, we would like to take this opportunity to thank you for helping to make this a good year for ZYGO-USA. We know there has been much to think about, like those still struggling from the effects of Hurricane Sandy, and the global financial situation, and how the assistive technology industry has changed.

From all of us at ZYGO-USA, Happy Holidays, and best wishes for a Happy New Year!

If you have any questions or need any support for our products, please contact me at Adam@zygo-usa.com, or by phone at (888) 321-6006, or any of our Customer Support representatives at zygo@zygo-usa.com, support@zygo-usa.com, or (800) 234-6006.
